## **Part 1 – Approach: urban intervention under the perspective of adaptation, complexity and emergence..... 1**

### **Chapter 01**

<b>Introduction.....</b>	<b>3</b>
1. Problem statement: complexity of current urban transformation processes.....	4
2. Research intention and questions.....	4
3. Research hypotheses.....	6
4. Research description.....	7

### **Chapter 02**

<b>Undertaking ‘Planned’ and ‘Emergent attitudes’ (Theoretical background).....</b>	<b>11</b>
1. Changing spatial and social conditions.....	12
2. Adaptation between planning, spatial and social conditions.....	12
2.1. ‘Planned attitudes’: Spatial and social conditions during industrialisation.....	12
2.2. Post-industrialisation: a new context of spatial and social conditions.....	13
3. The new context as a complex - emergent environment.....	14
4. Complexity and emergence in a scientific perspective.....	15
4.1. Complexity.....	16
4.2. Emergence.....	17
4.3. Conditions and consequences of complexity and emergence.....	17
5. Complexity and emergence in urban transformation processes.....	19
5.1. Urban transformation and ‘spatial integration’.....	19
5.2. Urban transformation and ‘social differentiation’.....	20
5.3. The consequences of integration and differentiation in planning practices.....	21
6. ‘Planned’ and ‘Emergent attitudes’ as adaptive responses.....	22
7. ‘Planned’ and ‘emergent attitudes’ within planning theory.....	22
7.1. Difficulties to orderly manage urban environments.....	23
7.2. Difficulties in managing participant actors.....	23
7.3. Difficulties to validate decisions.....	24
7.4. Difficulties in forecasting outcomes.....	24

<b>Chapter 03</b>	
<b>Methodological considerations</b>	<b>27</b>
1. Introduction: approaching 'planned' and 'emergent attitudes'	28
2. Conceptual approach: planning systems and planning attitudes	29
2.1. Object of study: planning systems, attitudes and their influencing conditions	29
2.2. Viewpoints of observation: 'chronological' and 'contextual' perspectives	32
2.3. Indicators of 'Planned' and 'emergent attitudes'	32
2.4. Conclusions from the conceptual approach	37
3. Procedural Approach: proposing, analysing, comparing and concluding	37
3.1. Conceptual and methodological approach	38
3.2. Case study analysis	38
3.3. Comparisons and conclusions	43
4. Introduction to the following parts of the research	45
<b>Part 2 – Analysis: 'planned' and 'emergent' attitudes in the Randstad and Bogotá regions</b>	<b>49</b>
<b>Chapter 04</b>	
<b>Urban intervention in the Randstad Region</b>	<b>53</b>
1. Introduction: actors and influences in the Randstad's urban transformation process	55
2. Spatial development in the Randstad Region	57
3. Urban intervention in the Randstad Region	63
3.1. Former planning approaches	63
3.2. Current planning approaches	69
4. Validating 'planned' and 'emergent attitudes' in the Randstad Region	73
5. Introduction of subsequent case studies	77
<b>Chapter 05</b>	
<b>The Zuidas development in Amsterdam</b>	<b>79</b>
1. Introduction: actors and influences in Amsterdam's urban transformation process	81
2. Spatial development in Amsterdam	82
3. Urban intervention in Amsterdam	86
3.1. Former urban intervention attitudes	86
3.2. Current urban intervention attitudes	91
4. The Zuidas development: changing urban intervention attitudes in Amsterdam	94
4.1. The Ij-Oevers project: a point between former and current planning attitudes	94
4.2. The Zuidas location in relation to private parties' needs	94
4.3. Negotiating the project: interested parties, cost-benefits and opportunities	95
5. Validating 'planned' and 'emergent attitudes' in Amsterdam and the Zuidas	101
<b>Chapter 06</b>	
<b>The As Leiden – Katwijk project (ALKP) in the Rijnland Region</b>	<b>107</b>
1. Introduction: actors and influences in the Rijnland Region urban intervention process	109
2. Spatial development of the Rijnland Region in the Randstad	111
3. Urban intervention in Rijnland	116
3.1. Former planning approaches	116
3.2. Current planning approaches	119
4. The 'As Leiden-Katwijk Project' (ALKP)	122
4.1. Collecting scattered projects to make a regional plan	122

4.2. The As Leiden-Katwijk (ALK) workshop (June-September 2006)	126
5. Validating 'planned' and 'emergent attitudes' in the Rijnland Region	129

## Chapter 07

<b>Urban intervention in the Bogotá Region</b>	<b>137</b>
1. Introduction: actors and influences in the Bogotá Region urban intervention process	139
2. Spatial development in the Bogotá Region	143
3. Urban intervention in the Bogotá Region	145
3.1. Former planning approaches	146
3.2. Current Planning approaches	152
4. Validating 'planned' and 'emergent attitudes' in the Bogotá Region	157
5. Introduction of subsequent case studies	161

## Chapter 08

<b>The North Station Area (NSA) development in Bogotá</b>	<b>165</b>
1. Introduction: actors and influences in NSA urban intervention process	167
2. Spatial development in Bogotá	168
2.1. First three growth-phases: centrality and periphery distinctions	170
2.2. Sub-centralities and the recent augment of peripheral strength	171
3. Urban intervention in Bogotá	174
3.1. Former planning approaches	176
3.2. Current planning approaches	179
4. The Urban development of NSA	183
4.1. Piecemeal development at NSA	183
4.2. Congestion problems arise	184
4.3. Resulting spatial characteristics at NSA	185
4.4. Planning limitations to coordinate development in NSA	188
5. Validating 'planned' and 'emergent attitudes' in NSA	189

## Chapter 09

<b>Regional Planning Board Bogotá – Cundinamarca (MPRBC)</b>	<b>195</b>
1. Introduction: actors and influences in the Bogotá-Cundinamarca region	197
2. Recent interactions between Bogotá and its surrounding municipalities	199
3. Planning Responses and steps towards regional acknowledgment	201
3.1. Former planning approaches (which did not generate a truly regional management)	201
3.2. Current planning approaches (leading to the acknowledgement of a regional agenda)	202
4. The work of the Regional Planning Board Bogotá – Cundinamarca (MPRBC)	206
4.1. Inherent problems of a complex regional task	206
4.2. Organisation, objectives and procedure	206
4.3. Activities	207
4.4. Outcome	210
4.5. Conclusions	216
5. Validating 'planned' and 'emergent attitudes' in the work of MPRBC	216

<b>Part 3 – Comparison and discussion: exploring the consequences of employing 'planned' and 'emergent attitudes' in urban intervention</b>	<b>221</b>
---	------------

## Chapter 10

<b>Comparative analysis and discussion from case studies</b>	<b>223</b>
1. Introduction - comparing the case studies	224

2. Chronological perspective: general similarities	224
2.1. 'Planned attitudes' in the Randstad and Bogotá regions (1920's - 1980's)	225
2.2. New context of requirements and the operative limitations of 'planned approaches' (1980's)	228
2.3. 'Emergent attitudes' in the Randstad and Bogotá regions (1990's – 2007)	234
2.4. Conclusions regarding the chronological perspective	239
3. Contextual perspective: particular differences	240
3.1. Directionality and level of control	240
3.2. Trust between participant actors	241
3.3. Land ownership	242
3.4. Planning adaptability	243
3.5. Formal and informal planning and development	244
3.6. Characterising differences in the Randstad and Bogotá planning systems	244
4. Analysing the case studies within chronological and contextual perspectives	246
4.1. Combining chronological and contextual analysis	246
4.2. Coordinating 'planned' and 'emergent attitudes' simultaneously	248
<b>Chapter 11</b>	
<b>Conclusions and recommendations</b>	<b>253</b>
1. Introduction	254
2. Simultaneity of 'Planned' and 'emergent attitudes'	254
2.1. Empirical perspective: combining 'planned' and 'emergent attitudes' in the case studies	254
2.2. Theoretical perspective: Planning theory and combining 'planned' and 'emergent attitudes'	257
3. Risks and benefits of combining 'planned' and 'emergent attitudes'	259
3.1. Dealing with uncertainties (benefit)	260
3.2. Surpassing ideologies or preconceptions (benefit)	261
3.3. Sensitivity and reflexiveness (benefit)	262
3.4. Homogenising public and private powers to the extent that there is no public control (risk)	264
4. The role of public planning within complexity and emergence	265
4.1. Current urbanisation demands	265
4.2. Planning responses to past and current demands	267
4.3. Required conditions to deal with contemporary spatial and social demands	267
4.4. Implications to planning within contemporary spatial and social conditions	271
4.5. Planning levels: 'The regional' as the most inclusive planning level	274
5. Further research	275
<b>Literature</b>	<b>277</b>
<b>Acknowledgments</b>	<b>287</b>
